# Onyxia

Dynamic Cybersecurity Management Platform

With new industry regulations, effective cybersecurity risk and operational management are more critical now than ever. Yet CISOs often rely on spreadsheets to manually manage and report on their security programs. Onyxia delivers powerful predictive insights and data intelligence so that CISOs can proactively improve risk management, ensure organizational compliance, and align their security initiatives with business goals.
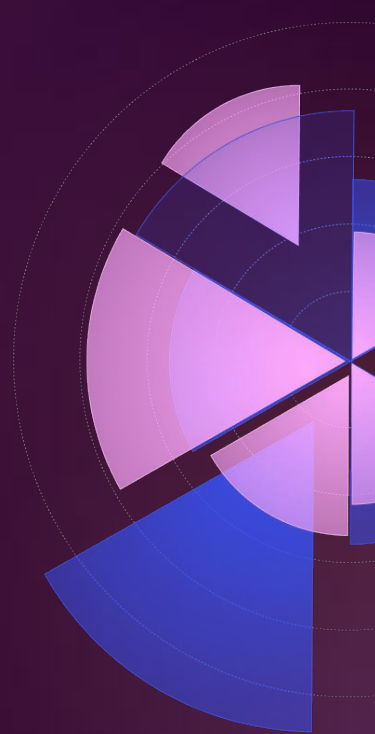

Turn Your Data into Power

Real-Time Security Program Assessment and Benchmarking

Automate tailor-made program assessments and benchmark your performance against industry standards. With our mobile app, your security program is at your fingertips anytime and anywhere.

Automated Business and Board Reporting

Communicate how your security initiatives connect to your organizational goals with customized board reports, proactively address cyber risk committees, and demonstrate industry compliance.

Security Stack and Asset Coverage Visibility

Find blind spots and optimize tech stack efficiency. Onyxia helps identify gaps or overlaps in your security program and device coverage, ensuring alignment with key frameworks.

OnyxAI: AI-Powered Insights and Recommendations

Proactively detect future crises with program trend predictions, receive smart suggestions for strategic improvements, and gain powerful insights and deeper analysis into performance.

"

Onyxia's Cybersecurity Managment Platform has brought us immediate value. The deployment was straightforward, the the total cost of ownership is minimal, and we now have a complete cyber dashboard that we can count on to provide accurate and meaningful insights into where our cybersecurity program stands."

- Yael Urman, CTO of SILVERSTEIN PROPERTIES

Onyxia

Our Cybersecurity Management platform, recognized as a sample vendor by Gartner, incorporates Cyber Defense Planning and Optimization (CDPO), Exposure Management, and Cybersecurity Mesh Architecture.

With our data fabric, we collect and analyze data from the organization's entire security ecosystem. Based on the analysis, we provide the CISOs with continual program assessment and benchmarking, automated reporting, and meaningful insights regarding their program performance.

Benefits of Our Award-Winning Platform

Personalize Your Experience
Set your SLAs, select your reporting metrics and add weight scoring to your Cybersecurity Performance Indicators (CPIs).

Full User Management
Invite and assign roles to your security team and create an executive-specific view for interested stakeholders.

Framework Compliance Dashboard
Convert your dashboard to measure performance based on your organization's preferred compliance framework.

Quick and Seamless Integration
Connect your entire security stack in minutes and gain benefit from Onyxia on day one.

About Onyxia Cyber

Onyxia Cyber is on a mission to empower Chief Information Security Officers and security leaders with the ability to continuously strengthen their security programs and proactively reduce risk exposure. Founded in 2022 by a former CISO, Onyxia delivers an intelligent Cybersecurity Management Platform that provides powerful predictive insights and proudly serves leading enterprises across a variety of industries and sectors. With Onyxia, CISOs gain a simplified way to ensure organizational compliance, improve risk management, and align their security initiatives with business goals.

From Reactive to Proactive to Predictive.
